Lab Instructions for Ordering in Horizon LIS

Path: Launcher –Data Entry – Order Entry

Order tests using ECD and date created in Soarian

1. Select the New icon (blank paper) on toolbar.
2. Select **Detail – Encounter**.
3. Tab 1 - Enter patient ID and pick the encounter with the correct location and date of service.
4. Tab 2 - Enter test code **FMTDONOR** and Enter or Tab. This will order all of the tests listed above. Do NOT order each test individually.
5. Change any information such as collection date and time, priority, etc.
6. If you need to enter any test comments - comments specific just for that test - not all tests that you are ordering, see Order Comments training guide.
7. Click Add.
8. Click the Save icon (diskette) on toolbar. A label will print at the label printer designated for your workstation.
