

2015 NextGen One User Group Meeting in Las Vegas

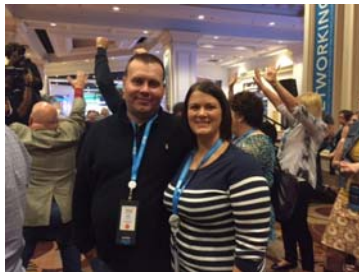

Every year, Dr. Fern, Erin Patton (SIG administrator) and Mellissa Adams (AEC administrator) attend the NextGen User Group meeting. This year is held in Las Vegas. This annual event, held in Las Vegas, highlights the new electronic medical record products that are available for the office of Specialists in Gastroenterology and at the Advanced Endoscopy Center. This grueling three day experience of presentations and meetings showcases ways to increased productivity and streamline endoscopic and office consultations and visits. There is a Hands-On room to practice and evaluate the products, opportunity to network with other GI groups and to share information. The event is culminated by a Bash of top entertainers that have included groups such as Styx, Huey Lewis and the News, Foreigner and Sammy Hagar.
